

PROJECT HANDOUT

Term Project

Dmytro Poliak

Student Number: 100443432

Section: A11

Date: 30.07.2024

"This project, all names, characters, and incidents portrayed herein are fictitious. No identification with actual persons or fictitious characters should be inferred. No animals were harmed in the making of this project."

OVERVIEW

This topic will involve analysis of a business case and the design of a network to support it. The precise details of the business case are below. For the project you will be required to:

- a. Create an organization chart for the business.
- b. Provide cost data for the system's hardware, software and licenses, including references for your prices.
- c. Design and document the organizational units, security groups, and shared folder configuration that you will need.
- d. Configure Windows Server 2022 for the business, including DNS, folder/file sharing and printer sharing. e. Implement the OU and security group plan.
- f. Add a folder redirection GPO.
- g. Create an IT Department web page for the business, and deploy it using IIS server.
- h. Submit a report including screenshots verifying every aspect of the implementation. You should also describe what work would be needed from this point to actually implement your system in real life.

Part 3: Implementation I Due: July 30

Set up a Windows Server 2022 machine to manage all users, printers, workstations, file sharing (folders), etc. according to the following. It is preferable for you to create a new server for this purpose rather than using the server you have used for this semester's assignments and labs, but if necessary you may re-use the assignment server.

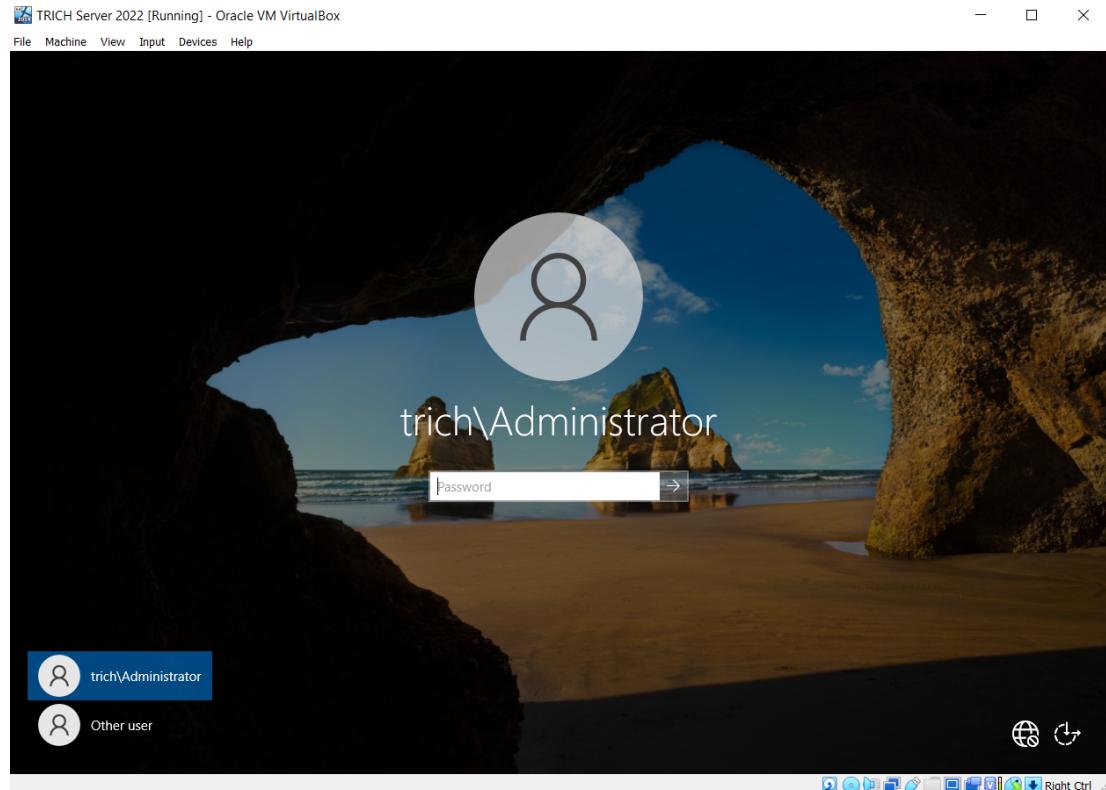

On this server you must:

- Create all the necessary user accounts.
- Create computer accounts for all your workstations.
- Add the printers to your server, create the printer pool, and share the printers with appropriate permissions.
- Create the folder shares, and use AGDLP to create groups and to configure sharing according to your plan.
- Take screenshots of the server to show you have done all these steps.
- Join one workstation to your domain.

- Install the printers on your client computer.
- Take screenshots while logged into the client workstation to show permissions work to allow access to your folders and printers. Go through each resource (folder or printer), and take one screenshot showing access works for an authorized user; you don't have to show what happens for unauthorized users. There should be exactly one screenshot for every shared folder and shared printer.

Implementation I

Configure AD:

Organizational Units:

Medical:

TRICH Server 2022 [Running] - Oracle VM VirtualBox

File Machine View Input Devices Help

The screenshot shows the Windows Active Directory Users and Computers management console. The left pane displays a tree view of the directory structure under 'ad.trich.local.com'. A folder named 'Medical Stuff OU' is selected and highlighted with a blue border. The right pane lists users within this organizational unit (OU). The columns are 'Name', 'Type', and 'Description'. The data is as follows:

Name	Type	Description
Stephen Stra...	User	Primary Care Physician, ...
Peter Parker	User	Nurse
Michelle Jon...	User	Nurse
Ned Leeds	User	Nurse
Drax	User	Physical Therapist
Thanos	User	Physical Therapist
Scott Lang	User	Physchologist
Hope Van D...	User	Nurse

Admin:

The screenshot shows the Windows Active Directory Users and Computers management console. The title bar reads "TRICH Server 2022 [Running] - Oracle VM VirtualBox". The menu bar includes File, Machine, View, Input, Devices, and Help. The ribbon tabs are File, Action, View, and Help. The left pane displays the navigation tree under "Active Directory Users and Computers" and "ad.trich.local.com", showing various organizational units like Builtin, Computers, Domain Controllers, etc. The right pane lists users in a table:

Name	Type	Description
Pepper Pots	User	Business Partner
Tony Stark	User	Owner

Create Computers for all your workstations:

Ideally, we should have 15 laptops. One laptop for every person. But for this example, I will create 4 workstations, one workstation for each department just to show how it should work.

Top Management Global Group:

TRICH Server 2022 [Running] - Oracle VM VirtualBox

File Machine View Input Devices Help

The screenshot shows the Windows Server Manager interface. On the left, there's a navigation pane with icons for Recycle Bin, Microsoft Edge, and Active Directory Users and Computers. The main area shows the 'Server Manager' dashboard. A modal window titled 'Top_Managment_GG Properties' is open, specifically the 'Members' tab. The table lists the following members:

Name	Active Directory Domain Services Folder
Pepper Pots	ad.trich.local.com/Admin OU
Tony Stark	ad.trich.local.com/Admin OU

At the bottom of the modal are 'Add...', 'Remove', 'OK', 'Cancel', and 'Apply' buttons.

Management Global Group:

The screenshot shows the Windows Server 2022 Active Directory Users and Computers interface. The left sidebar includes icons for Recycle Bin and Microsoft Edge. The main window displays the 'Server Manager' dashboard. A context menu is open over the 'Management_GG' global group, showing options like 'File', 'Action', 'View', 'Help', and navigation icons. The 'Members' tab of the 'Management_GG Properties' dialog box is selected, showing two members: 'Kevin Feige' and 'Stephen Stra...'. Both entries point to the 'ad.trich.local.com/Support Staff OU'. Buttons for 'Add...', 'Remove', 'OK', 'Cancel', and 'Apply' are visible at the bottom of the dialog.

Name	Active Directory Domain Services Folder
Kevin Feige	ad.trich.local.com/Support Staff OU
Stephen Stra...	ad.trich.local.com/Medical Stuff OU

Create Domain Local Groups for sharing files and for sharing printers:

The screenshot shows the Windows Server 2022 Active Directory Users and Computers interface. The left navigation pane shows the domain structure under 'ad.trich.local.com':

- Admin OU
- Admin_Records_DL
- Builtin
- Computers
- Domain Controllers
 - ForeignSecurityPrincipal
 - IT Department OU
 - Managed Service Accounts
 - Medical Stuff OU
 - Support Staff OU
 - Users

The main pane displays a table of objects:
